the Withdrawal of an Insuit. A story reliably vouched for is current in certain circles in this city of an affair between parties now in Richmond, commencing five years ago and ending within the past week, which is unique and dramatic enough for one of Dumas'

strongest books.

One of the parties concerned is a broker, and the other is a well-known telegraph operator, who is also a prominent member of a Baptist church.

Five years ago they were both opera-tors in the employ of the Western Union Telegraph Company. One manipulated the key in Richmond and the other at the Greenbrier White Sulphur Springs.

Greenbrier White Sulphur Springs.

In the course of business a dispute arose between the two men over the wire concerning a mistake made in a message sent by one and received by the other, which resulted in angry words, tapped upon the key, and a gross insult from the White Sulphur operator to the Richmond operator. Although separated by two hundred miles of wire, the insult rankled in the heart of the Richmonder, and he gave his enemy to understand that if they ever met the day of reckoning would come. The matter was reported to the superiatendent, who investigated the matter, and the White Sulphur man removed.

Time, which is supposed to heal all wounds, sped on, and the episode of five years ago was obliterated from the minds of all in Richmond, except the operator who received the insult, but he, like the elephant in the circus who treasured up a memory against a little hay on account of a chew of tobacco, and paralyzed him when a man, forgot not his injury, but let it rankle in his heart until the day of retribution, believing with Napoleon that "all the world comes to him who knows how to wait."

how to wait."
Old Father Tempus fuglied along year after year, and the disturber of his peace of mind turned not up until a few days ago. During the past week, however, a stranger came to Richmond and opened a broker's office on one of the lower streets, and one of his first visitors was the Richmond operator, who stepped up and said, Are you Mr. —? Yes sir, replied the broker. My name is —, I am the man you insulted five years ago. I am armed, and I have come to demand an apology. You can proceed to write one at my dictation, or you can take the conat my dictation, or you can take the con-sequences. The demand was followed by an ominous motion of the arm and hand and without further demurrer the apology

was written as directed.

The story of the small boy, the elephant and the chew of tobacco simply pales into insignficance before such a memory as
